

Patient Name:	PRATIMA BALA	Patient ID:	20F25-20775
Patient Age:	056	Patient Gender:	Female
Test Date:	20-06-2025	Report Date:	2025-06-20
Referral Dr:	DR.SK.MD.SABIR	Report Time:	12:24:32

PLAIN CT OF KIDNEYS, URETERS AND URINARY BLADDER

Findings

Right kidney is small in size with severely atrophied cortical parenchyma and few discrete tiny calcifications - Atrophied right kidney

Right ureter is normal in course and calibre.

Left kidney is normal in size. A small calculus of size approx 5.3 mm noted in the midureter with resultant upstream mild ipsilateral hydroureteronephrosis

Left ureter is normal in course

Urinary bladder is distended and shows mild bladder wall thickening . A small diverticula noted in the right lateral wall of bladder measuring approx 2.5 x 4 cm.

Uterus and ovaries not distinctly visualised

IMPRESSION

- left midureter small calculus with resultant upstream ipsilateral hydroureteronephrosis.
- Severely atrophied right kidney as described.
- features of chronic cystitis in bladder with small diverticula as described
